

INEAR UHF PLL MONITOR SYSTEM

IM700 SERIES

- Elegant multi-function LCD panel.
- Frequency Range : 720 - 865MHz
- EIA standard half rack metal housing with rack ears.
- XLR combo connector for balanced and unbalanced inputs.
- UHF- band PLL synthesized design.
- Frequency agility over a 25MHz bandwidth, with preprogrammed frequencies available.
- Dynamic expander circuitry delivers S/N ratio greater than 90dB.
- Built-in limiter circuitry eliminates distortion under excessive input levels & front panel monitoring headphone jack

Features Of Transmitter

Features of Receiver

- UHF-band PLL synthesized design.
- Frequency agility over a 24MHz bandwidth, with preprogrammed frequencies available with the touch of a single button.
- Dual-antenna true diversity reception eliminating signal dropout and enhancing RF stability.
- Dynamic expander circuitry delivers S/N ration greater than 90dB
- Stereo or mono audio output selectable with the touch of single switch. & Signal indicators.
- Highly efficient power consumption circuitry ensures long operating hours from two AA batteries.
- Dual unbreakable soft antennas.
